

Bollywood Music -

Signature Bollywood music production is something that must be mastered if one wishes to make a musical career in India. Indian films are marked by an authentic musical colour that draws heavily from sounds and cultural connotations that are local to the country. Understanding the beats and tonality that give Indian music their unique identity is the first step towards developing an expertise in them.

Our music production course specializing in Bollywood music, allows students to develop a broad understanding of the Indian groove and rhythm. Through categorical sessions that take students on an upward journey, the course enables an individual to extensively understand the crux of Bollywood music and progress towards having a perfect grasp on it. By incorporating the steps of recording, editing, and mixing and mastering in each production lesson, the course lets students take a practical, hands-on approach towards learning and these techniques are entirely different and based on Indian Bollywood music making style. The mentor has experienced of more than 2 decades in Bollywood.

While we know that sound knowledge of production tools forms the foundation of making music, what distinguishes us is the training we impart in the inventive use of these tools to create timeless tunes and classics. We help students in recognizing the details that make a song truly memorable and teach them techniques to incorporate this wisdom and insight into their own creation.
